UK Solar Power Panels

It has never been easier to generate electricity from solar panels, a reliable and clean way to use solar power. How little it costs to benefit financially, reduce carbon emissions considerably and contribute to the environment may surprise you!

- Quality engineered materials and top brand name monocrystalline panels that carry a 25 year warranty.
- MCS certified, RECC accredited, NAPIT members and able to satisfy all Building Regulations.
- No underhand sales tactics, we let our quality and prices speak for themselves.
- We calculate the amount of power your installation will produce using UK Government regulated Standard Assessment Procedures (SAPs).
- ✓ We carry £5m of public liability insurance cover.
- An average installation will save over 1 tonne (1,000 Kg) of carbon emissions each year
- The total installed capacity of solar energy in the UK is currently 15.7 Gigawatts (15.7 billion Watts) as of January 2024.
- As of March 2024 there are currently just under 1.5 million registered solar PV installations in the UK.

Domestic installations account for 29% of the UK's total solar capacity, and made up 77% of the new capacity added in January 2024, when 58 Megawatts (58 million Watts) were installed in that single month!

Roof Survey One of our solar surveyors will visit your

25 Year Guarantee

All of our solar panels are covered by a 25 year

What We Do

Survey the roof & loft space

property and inspect your roof. We will present you with the facts and leave you to make a decision in your own time. We may make a courtesy call after a week or two to discover if you need any more information.

We never use hard sales techniques and never employ pushy sales people.

warranty which guarantees that after 10 years the output from the panels will still be at least 90% and after 25 years at least 80%.

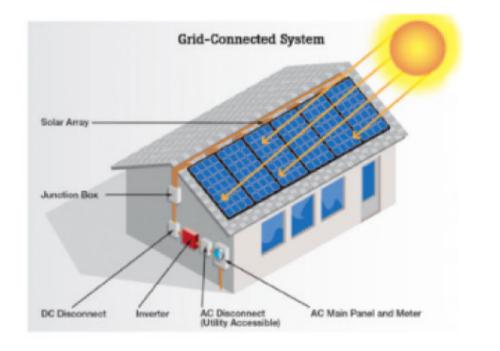

Additionally, we offer a 10 year guarantee of our workmanship that is backed by an insurance policy issued by the Independent Warranty Association (see below).

- Produce a quotation
- Assemble scaffolding
- Mount panels on the roof
- Install inverter in loft or garage
- Connect inverter to mains junction box
- Register the installation
- Commission the installation

process

A standard domestic installation typically takes just 3-4 days for our team to complete.

More about the solar panel installation

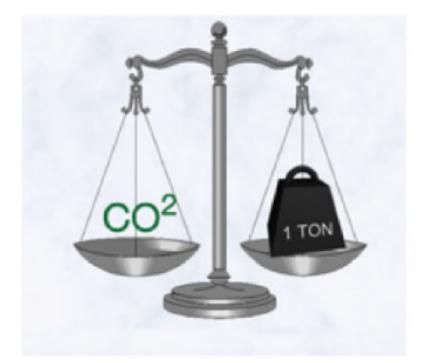

Power Generation

There are 7 factors that control power output:

- Direction of the roof
- Light Levels
- Angle of the roof
- Local daylight intensity at your location

More information on power generation

- Climate/Weather
- Panel Efficiency
- System Design

Carbon Emissions

UK Solar Power Panels is dedicated to reducing carbon emissions, to finding new and efficient sources of alternative energy as well as providing you with value for money.

A typical 4kW installation will save nearly 2 tonnes of carbon each year.

Smart Export Guarantee (SEG)

The Smart Export Guarantee is the new way to get paid for your power. If you have a solar PV system, and generate more power than you need, the surplus will be put onto the National Grid.

Under the Smart Export Guarantee, electricity suppliers offer payment for each unit of power you export to the National Grid.

Our league table reveals which suppliers are offering the best rates. Note that the best rate may not always mean the best energy package. UK Solar Power Panels recommends shopping around for the best deal as these are constantly changing in a competitive market.

Read More

RECC Accreditation

The Renewable Energy Association set up the RECC Assurance Scheme to guarantee a high quality experience for consumers wishing to buy or lease small-scale energy generation systems for their homes.

The RECC Assurance Scheme logo is a sign that UK Solar Power Panels Ltd. has agreed to abide by the high standards set out in the RECC Consumer Code.

UK Solar Power Panels RECC membership No. 00042945

MCS Registered

A government certification scheme, based on UKAS accreditation to certify the compliance of installers and equipment with industry standards for the installation of small scale renewable energy technology including solar photovoltaic installations.

UK Solar Power Panels is certified under registration number NAP 16146.

NAPIT Registered

NAPIT is a government appointed registration and certification body authorised to certify Companies under the Microgeneration Certification Scheme (MCS) and to operate Competent Persons Schemes (CPS) under the Building Regulations.

Membership No. NAP 16146

Government SAP

The Standard Assessment Procedure (SAP) is the UK Government's recommended system for measuring the energy rating of residential dwellings.

SAP

Some of these standards apply to solar power generation and are used to calculate the efficiency of specific solar panel installations.

We use these SAPs when we calculate the power output of your system, plus the money that you save and earn from selling power back to the National Grid.

Government Standard Assessment Procedure

IWA Member

As standard, we include full warranty insurance cover and deposit protection insurance. Should we go out of business over the period of the 10 year installation warranty, then your warranty will be honoured by that insurance scheme.

With deposit protection, your 25% initial payment is completely covered. If the work is not completed for any reason, your money is safe.

Membership No. UAT-10-11
