About BATFARBAND

Alexx Calise and Dennis Morehouse were exposed to music from a very young age. They've been feeling the effects ever since.

Comprised of Calise, an introspective lyricist and "harmony machine", and Morehouse, a masterful arranger and sound manipulator, Batfarm is a two-piece alternative rock band whose sound can be best described as "darkedelic". The multi-instrumentalists keep it small not only for efficiency's sake, but also to keep creating the music they want without added personalities.
